

Accelerated Transformation to Self-Service Analytics

“ 83% of CEOs want their organizations to be more data-driven
IDC

CHALLENGES

- Large inventory of pre-built reports
- Myriad of BI software and tools in use
- No documentation & hidden reporting logic
- Dependencies on legacy skills and Business SMEs

“ Self-service analytics and BI users will produce more analysis than Data Scientists will
Gartner, Inc.

OBJECTIVES

- From 100s of reports to interactive dashboards
- Analytical discovery and governed self-service
- Removing proliferation and silos
- Mitigating privacy and security risks

TCS' Machine First™ approach for accelerated modernization of legacy BI

SOLUTION

To Tableau's modern, unified visual analytics platform

TCS Daezmo™ REX

- Automated discovery of multi-layer reporting logic
- Unified end-to-end lineage and easy discovery

Tableau Visual Analytics Platform

- Data Prep: combine, shape, clean data for analysis
- Visualization: self-service, collaborative, intuitive
